#### CAF Phase II Challenge – Evidence of No Broadband Service – No Broadband Service At Requisite Speed Offered

CenturyLink has reviewed broadband provider websites for information regarding their broadband services including whether they offer broadband service at speeds of at least 4 Mbps downstream and 1Mbps upstream (4/1). The Commission has permitted a presumption that if a provider is shown as offering broadband service at a speed of at least 3 Mbps downstream / 768kbps upstream (3/768) on the National Broadband Map that the provider is offering at least 4/1 broadband service that can qualify them as an unsubsidized competitor if the other qualifying criteria are met. But, in reviewing broadband provider website information, for certain providers in certain areas CenturyLink has been unable to find any information that the providers are offering broadband service at speeds of 4/1, so as to be offering the requisite broadband speed to qualify them as an unsubsidized competitor. As such, for the census blocks identified in the attached declaration, the Commission should re-categorize these census blocks as unserved and eligible for CAF Phase II support.

#### DECLARATION OF GERALD FLURER

- 1. My name is Gerald Flurer. I am employed as a Regulatory Operations Director at CenturyLink. My business address is 600 New Century Parkway, New Century, KS. In my current position at CenturyLink, some of my responsibilities include managing various GIS mapping projects which have included compiling and submitting CenturyLink's data for the National Broadband Map (NBM).
- 2. In this declaration, I describe the steps CenturyLink has taken to determine that the providers identified in the list attached to this declaration are not providing the requisite broadband service in the identified census blocks. As such, CenturyLink submits that these census blocks should be re-categorized as unserved and eligible for CAF Phase II support.
- 3. CenturyLink developed a list of high-cost census blocks and providers serving those census blocks that CenturyLink would be interested in serving if they were in fact unserved with the requisite broadband and voice service and eligible for CAF Phase II support.
- 4. I and others reviewed provider websites for whether the providers were offering broadband service at speeds of at least 4 Mbps downstream /1 Mbps upstream (4/1) the speed necessary for a provider to qualify as an unsubsidized competitor for CAF Phase II purposes. For the list attached to this declaration, we could not find any information on the provider website that the provider was offering broadband service even at speeds of at least 3 Mbps

downstream / 768 kbps upstream (3/768). Also attached to this declaration are screen prints of the websites where no offering of broadband service at speeds of at least 3/768 could be located.

5. As such, CenturyLink submits that these providers are not offering broadband service at a speed that qualifies the provider as an unsubsidized competitor in the identified census blocks for CAF Phase II purposes. Consequently, these census blocks should be re-categorized as unserved and eligible for CAF Phase II support.

I declare, under penalty of perjury, that the foregoing is true to the best of my knowledge, information, and belief.

#### **ACTACCESS.NET Internet Access Agreement**

This ACTACCESS.NET Access Agreement ("Agreement") is entered into by the subscriber ("you") and ACTACCESS.NET. ("ACTACCESS"). This Agreement sets forth the terms and conditions under which you agree to use ACTACCESS Service and under which ACTACCESS agrees to provide services to you. THESE TERMS AND CONDITIONS IMPOSE IMPORTANT REQUIREMENTS ON YOU REGARDING YOUR USE OF ACTACCESS' SERVICE AND YOU SHOULD READ THEM CAREFULLY. You and ACTACCESS agree to the following terms and conditions:

#### 1. SCOPE OF SERVICE

- 1.1 1.1 ACTACCESS will provide you with access to ACTACCESS Online dial-up, or as applicable, ACTACCESS DSL Internet Access Service (the "Service") in accordance with the terms of this Agreement. The Service consists of: (a) access to the Internet, (b) a license to use Microsoft Internet Explorer, or Netscape Communicator/Netscape NavigatorTM, as applicable, (c) use of an electronic mail account or multiple accounts where available, (d) access to Usenet or other newsgroups, (e) optional Personal Web Space, (f) optional managed e-mail messaging with business DSL and (g) if applicable, DSL transport when combined with the Service.
- 1.2 Service may be temporarily unavailable or limited because of capacity limitations and may be temporarily interrupted or curtailed due to circuit or equipment failures, or due to modifications, upgrades, relocations, repairs, and similar activities necessary for the proper operation of the Service. ACTACCESS may, at anytime, without notice or liability, restrict the use of the Service or limit its time of availability in order to perform maintenance activities and to maintain session control.

#### 2. AUTHORIZED USER

- 2.1 You warrant that the information for your registration with the Service is correct and complete, and you agree to contact ACTACCESS to update your information promptly. ACTACCESS will provide you with a User Identification code ("UserID") and password for each account purchased to enable your access to the Service.
- 2.2 You warrant that you are eighteen years of age or older and that you are responsible for all usage of the Service and any other services accessed through the Service on your account. You further agree that your use of the Service will only be from the United States.
- 2.3 You may not use more than one IP address for each log-on session. DSL customers may connect multiple computers/devices within a single location to their DSL line and access the Service through a single DSL account and a single IP address.
- 2.4 You may not resell the Service or engage in similar activities, commercial or non-commercial, which constitute resale, use the Service for high volume or commercial purposes, or as a dedicated or quasi-dedicated line, except as noted below for DSL customers, as determined by ACTACCESS at its sole discretion. If your dial-up account is idle for fifteen (15) minutes, it will be subject to log-off automatically and without notice. An account session may be deemed to be idle if there appears to be no interactive, human generated data received from the remote user's computer system within a prescribed amount of time. Automated data is not considered interactive or human generated; automated data includes but is not limited to data generated by an automatic re-dialer, script or other program that runs on a computer system for the purpose of avoiding inactivity disconnects, and the automated checking of e-mail or "pinging" the host to maintain a constant connection. ACTACCESS reserves the right to audit connections electronically to enforce the above requirements. DSL customers use quasi-dedicated connections and may not be subject to disconnection due to inactivity.
- 2.5 ACTACCESS will issue e-mail account names based upon availability. If you surrender your account by changing it, terminating your account, or because your account is terminated for cause, ACTACCESS shall not be obligated to reserve your e-mail account name or to receive or forward e-mails addressed to that account.

#### 3. TERM AND TERMINATION

- 3.1 This Agreement goes into effect upon completion of your order and shall continue, subject to the terms of this Section 3, until terminated by either party as permitted by this Agreement. Order completion occurs upon your submission of an order for service. Billing for your Service will automatically begin upon registration of your account and partial months service will be pro-rated based upon the date of completion. Registration may be accomplished either by you or by ACTACCESS.
- 3.2 Termination Provision Applicable to Month-to-Month DSL and Dial-Up Customers. Either party may terminate this Agreement without cause by giving notice to the other in accordance with the notice provision set forth at Paragraph 14.5 below. Termination by you will be effective immediately upon your notice to ACTACCESS and is subject to your payment of the remaining balance of the charges applicable to your Service for the month in which termination occurs. Activation or set-up fees paid at the initiation of your DSL Service are not refundable.
- 3.3 Termination Provision Applicable to Customers with Contractual Service Commitments for an Annual Period. The term of service for customers with an annual service commitment shall be for twelve (12) consecutive months beginning with the date of registration (the "Initial Term"), and continuing thereafter on a month-to-month basis until terminated by either party as permitted by this Agreement. In the event you terminate your Service before completing the initial term, then without limitation to any other remedy ACTACCESS may have, you agree to pay ACTACCESS upon discontinuance of the Service <u>a termination fee equal to the sum of the remainder of the months in the initial term</u>. Activation or set-up fees paid at the initiation of your Service are not refundable. If you terminate your service at any time after the Initial Term you will be responsible for the balance of charges for the month in which you give notice to ACTACCESS. Customers with a twelve (12) month service commitment who change their Service level or location may be subject to additional charges and/or a new twelve (12) month commitment.
- 3.4 Termination Provision Applicable to DSL Customers. ACTACCESS DSL Service uses telephone connections provided by Qwest Communications or Advanced Communications Technology. Accordingly, if you change your local telephone company, or your telephone service is disconnected for any reason, ACTACCESS will be unable to continue DSL Service and will terminate your account and you will be responsible for associated termination and reconnection fees. Voice telephone line monthly service and installation charges are not included in the offered DSL packages; these charges are itemized separately on your telephone bill.
- 3.5 All obligations of the parties under this Agreement which, by their nature, would continue beyond the termination, cancellation or expiration of this Agreement, including by way of illustration and not limitation those clauses relating to Limitation of Liability and Remedies (Section 12) and Indemnification (Section 13), shall survive such termination, cancellation or expiration.
- 3.6 If, in the sole discretion of ACTACCESS: (a) you are in breach of any of the terms of this Agreement (including all policies regarding abuse and acceptable use of the Service), (b) your use of the Service is disruptive or causes a malfunction of the Service, or (c) ACTACCESS receives an order from a court of competent jurisdiction to terminate your service, then ACTACCESS may terminate or suspend your Service immediately without notice. For termination in accordance with this Section 3.6, you shall be liable for the applicable fees and/or Equipment charges set forth in Sections 3.2, 3.3 or 3.4(depending on which fees or charges are applicable). The foregoing notwithstanding, ACTACCESS reserves the right to pursue any and all legal and equitable claims against you pertaining to your use or misuse of the Service. ACTACCESS, in its sole discretion, may refuse to

#### Frequently Asked Questions

#### What is WatchNet?

WatchNet is a high-speed broadband Internet connection brought into your home via line of site, point-to-point microwave link. We use the very latest in technology to provide this service, backed by Watch Communications excellent service!

#### What does line of site mean?

A line of site is an unobstructed view of our tower with no trees, buildings, etc in the way.

#### Do I have to have Watch TV in my home to get WatchNet?

No - although you can save money and get the convenience of one bill. You can pick and choose your levels of service with all of our products!

#### How does WatchNet connect to our computer?

You must have a 10/100baseT Ethernet Card installed in your computer for the WatchNet equipment to be connected to. For a small charge, we can install a network card for you at the time of installation. Most computers purchased within the last 5 years have a network card included.

#### What are the recommended computer requirements to get WatchNet installed?

Windows 98, 2000, ME, XP, Vista, and 7 will all work with our service. Linux or Macintosh OS/OSX will work also, but technical support may be limited. We recommend a computer with a Pentium CPU at 500 MHz or faster (or comparable Mac CPU), a 10/100 Ethernet card, 128MB RAM. And at least 100MB of free hard drive space. If you are using an Apple or Linux OS you may be responsible for set up. Your computer will need to have a web browser and email client installed, but no other special software is required.

#### How fast is WatchNet?

We offer packages with download rates of 768 Kbps, 1024 Kbps, and 1500 Kbps. These packages are comparable to average DSL offerings. Many things can affect the actual speed of your internet service beyond the ISP including your computer's performance and configuration, number of users and overall traffic on the Internet.

#### Are upload and download speeds the same?

No - the download speed is measured in 'UP TO' terms and may varies depending on many factors. It should stay within 80% of the rated package that you are subscribed to. The upload speed is much less and can be from 64Kbps-256Kbps depending on which package you have chosen.

#### Do I need an Internet Service Provider (ISP) with WatchNet?

No. We are a full-service Internet provider with e-mail, web space, spam and virus filtering services.

#### Can I connect more than one computer to my WatchNet?

Yes! You can purchase a network router from Watch Communications. The installer will connect it to your modem during the service installation. You can finish the rest of your network from there and hook up as many computers in your home you as wish for the same monthly cost. If you already own a router, the installer will connect it to our cable modem and set up one of your computers to connect through the router.

#### Is WatchNet secure?

Yes! Our Microwave signal is heavily encrypted, and only our equipment can communicate with our towers. Also, unlike many other wireless providers, we own the licenses for the frequencies that we use. This greatly decreases the potential for interference since we are the only company using those frequencies. We also provide spam and e-mail virus protection for your e-mail, which is currently the most common avenue for security breaches.

#### Do I need to change my e-mail address?

Not necessarily, but in most cases you will have to pay your current ISP a fee to keep it if they own the email address (if it uses their domain name, i.e. aol.com, woh.rr.com, etc). If you have a domain name we offer web hosting services and can handle your domain also. Click Here for more information.

Step up to the speed and reliability of

Forget long term contracts, telephone lines, small print, hidden fees and slow Internet! If you have dial-up now, this system functions much like that, EXCEPT much faster, like 20-100 times faster. NO telephone line needed! The prices below include everything you need to connect and surf the Internet. We furnish filtered email addresses, DNS and a connection to our Internet backbone. You can play on-line games, chat, send/receive e-mail, surf the web, download files, run VPN's and about anything else you're used to accessing on the 'net. Again, NO hidden charges or contracts that Denny Crain couldn't decipher. You continue to pay us as long as we provide quality service. We're locally owned and operated and have been providing wireless access for over 10 years in the Casper area to both residential and commercial entities. Our support is second to none and a local telephone call or email message away!

We now offer service in the 5.xGhz frequency. Installation remains the same but we can deliver far more bandwidth more reliably. Currently available in selected areas, priced at \$50 per meg/Mo. Available at Ghosttown, Airport, Cole Creek, Bessemer Bend and East Casper but the foot print is expanding all the time.

2.4 Ghz Wireless - Internet bandwidth from 1Mb/s to 3Mb/s.

- Free yourself from the cable company or the local phone system
- · Avoid slow Internet access problems over phone lines
- · Save time for the more important things in your life

Alluretech/CoffeyNet wireless can provide you with Internet bandwidth ranging from 1Mb/s to 3Mb/s. Installation does not include a router/firewall. Router/firewall products protect your private data, and computers from the prying eyes of the Internet. A router also allows more then one computer at your site to share the same Internet connection. We insist on having a hardware based router/firewall for better security. If you already have a router, we can use and will configure it for you at no additional charge.

Let us put Wireless to Work for you!

How does this wireless stuff work? Our Wireless Internet services are based on an innovative wireless technology. AllureTech uses a stationary antenna at the home or business receiving the service. The antenna is pointed toward a radio transmission access point (AP) to send and receive a signal. The antenna size varies upon signal quality, but is usually a small 8" x 11", about the size of a picture frame. The radio AP can send and receive high-speed Internet data to customers that are up to 10 miles away making it the perfect service for nearly all customers including suburban and rural areas that are too far away from the city to receive other broadband services.
